

# CNC MACHINE

## OIL WATER SEPARATOR

Effectively solve the deterioration of the cutting fluid and smell !

No worry about the interference of iron filings, regular cleaning and no consumption!

Extend the service life of cutting fluid and reduce production costs !

### NEW UPGRADE

# CNC MACHINE

## OIL WATER SEPARATOR

✓ Automatic control

✓ Accurate positioning

✓ Easy to move

✓ One for multiple machines

# CNC MACHINE OIL WATER SEPARATOR

- ✓ One for multiple machines
- ✓ Automatic control
- ✓ Easy to move

Accurate  
positioning

Higher  
efficiency

Easy to  
drain sewage

Easy  
to move

Oil Water Separator developed and produced by our company independently is applicable to all kinds of processing centers, CNC machine tools and other equipment. It can separate the oil from the cutting fluid which can not only extend life of the cutting fluid and tools to ensure the processing accuracy, but also improve the working environment and ensure the health of workers.

## TECHNICAL SPECIFICATIONS >>

Input Voltage	AC 110/220V 50/60Hz
Input Power	20W
Pump Motor Speed	0-90rpm Step-less Adjustable
Timing Range	0-99h Circulation
Oil Tank Capacity	8.7L
Operating Temperature	0°C--45°C
Filter Bottle Size	10 inches
Filter Hole Size	3mm
Inlet Pipe Inner Diameter	16mm
Outlet Pipe Inner Diameter	25mm
Drainage Pipe Inner Diameter	19mm
Overall Dimensions ( L*W*H)	600*350*580mm
Net Weight	32.8Kg

Before separating
